The new tariff law is proving feeted by the tariff. Even the Trenton potters now begin to see very plainly the difference between the McKinley tariff act and the new Wilson schedule. WHAT THE NEW TARIFF IS DOING.

Since January Bessemer pig iron in Pittaburg has advanced from \$10.06 the ton to \$12.50; steel billets commanded then \$14.75 and to day they market at \$18.60; gray forge pig bar is now worth \$10.85 and the best refined bar iron has increased to \$28, an advance of \$3.35. In the country at large there is a perfect shower of gains, confined to no special section. The rathroads are placing heavy orders for steel rails and the Baltimore and Ohio has decided to issue the usual 3 per cent. dividend on its preferred stock. While the Illinois Steel Company at | Juliet allows a 10 per cent. increase the Belmont Nail Company at Bellaire, Ohio, employing 1,000 mee, allows a second increase of 10 per cent. and a \$300,000 plate mill is to be erected there. From Milwaukee, Cleveland, Lewiston, Cohoss, Johnstown. Buffalo and other centres comes the same 10 and 20 per cent, increase in wages story.

The tide in all channels of business, trade and manufactures has indeed turned and it is running briskly, so much so that the recapitulation shows that since April more than 300 manufacturing cetablishments have voluntarily increased the wages of fully 500,000 workmen. There is time for even the calamity-howler to get in the swim. The new tariff schedule is effecting a revolution that has closed no occupation save that of the howler .- Philadelphia Times.

Washington, June 26.—The secretary of the treasury has decided to materially strengthen the south Atlantic and Florida coast patrols, and for that purpose will probably send down the revenue outters Forward, Morrow and Winona. These cutters will be assigned to the double duty of enforcing the quarantine laws against yellow fever infected vessels from southern ports and preventing the departure of any Cuban filibustering expeditions.

It is thought that with these additions to the naval force in these waters it will be almost impossible for any armed vessel to reach a Cuban port. The inspector made a thorough investigation along the whole coast, including all places accessible to beats of small draft, and found no evidence of any attempt to violate the neutrality laws. When his account of expenses was submitted to the treasury the officials held that it could not be paid out of their appropriations, as the work had no connection with the customs, and so it was referred to the department of state.
